ABOUT ME

Dedicated professional with a solid background in insurance, information security, client relations, and problem resolution. Proficient in **Excel**, **VMware**, **AWS** and **Python**. As a *Systems Engineer at Uber Freight*, implemented and maintained scalable solutions, streamlined operational workflows, and improved incident response times. Proficient in **SQL (MySQL)** for database management and **Jira** for project tracking, demonstrating a keen ability to solve complex issues and drive efficiency. Notable experience as an *IMX Product Owner and Claims Analyst at Coface* and *Claims Examiner at Allianz*. Known for a strong commitment to continuous learning, meticulous attention to detail, and effective performance both independently and in collaborative settings. Additionally contributed to scientific outreach projects for Antares.
